MARWANE MOUAWIYAH CISSÉ

Cybersecurity Engineering Student | Penetration Testing & Infrastructure Security

Rabat, Morocco | +212 6 10 09 34 21 | marwaneemouawiya@gmail.com

Portfolio: marwanecisse.github.io | github.com/marwanecisse | linkedin.com/in/marwane-cisse-78b6b5263

PROFILE

Fifth-year cybersecurity engineering student at the International University of Rabat, focused on penetration testing, offensive security and infrastructure protection. Practical experience in web security assessment, Windows/Linux security and PKI integration in IT/OT environments. Seeking a final-year cybersecurity internship.

PROFESSIONAL EXPERIENCE

Cybersecurity Intern — PKI & IT/OT Security Summer 2026

DataProtect

- Integrated a private PKI (EJBCA/Docker) with a Global Discovery Server (GDS) to manage OPC UA application certificates.
- Configured trust relationships, tested Push/Pull certificate renewal and validated industrial communications.

Cybersecurity Intern — Penetration Testing & OSINT Summer 2025

International University of Rabat (UIR)

- Assessed the OWASP Juice Shop training application for SQL injection, XSS and broken access control; mapped the attack surface using OSINT.

Web Development Intern Summer 2024

MyStarto — Côte d'Ivoire

- Contributed to the full-stack development of an e-commerce platform for refurbished products, including the user interface and back office.

SELECTED ACADEMIC PROJECTS

Enterprise OS Security — Active Directory & Linux 2026

Built a Windows Server/AD, Linux and Kali lab; performed controlled security tests, analyzed logs, hardened GPO/SSH/PAM/Fail2Ban and retested protections.

Zigbee Security — IoT Security 2026

Simulated a Zigbee-inspired IoT network in Proteus/Arduino with UART links; studied replay, spoofing, command injection and denial of service, proposing mitigations.

Cloud Attendance — Facial Recognition 2025

Group-photo attendance prototype with Azure Functions, Face API, DeepFace, MySQL and React; automated PDF reports and notifications.

Morocco Smart Guide — AI Travel Assistant 2026

RAG chatbot, FAISS semantic search and personalized travel itineraries using Python, FastAPI, Streamlit and Hugging Face.

EDUCATION

Engineering Program — Cybersecurity Specialization 2024 – Present

International University of Rabat (UIR) — Fifth year

Integrated Preparatory Program 2022 – 2024

International University of Rabat (UIR)

Science-focused Baccalaureate

Burkina Faso

TECHNICAL SKILLS

Offensive & defensive security: Web pentesting, OWASP Top 10, OSINT, Nmap, Burp Suite, Wireshark, log analysis, system hardening.
Systems, identity & OT: Active Directory, Windows Server, Linux, SSH/PAM, PKI/X.509, EJBCA, GDS, OPC UA.
Cloud, development & AI: Azure, Docker, VMware, Python, Bash, C/C++, React, MySQL, FastAPI, RAG/FAISS.

LANGUAGES

French: Fluent / professional proficiency | English: Intermediate (technical)
